Brand Energy & Infrastructure Services UK, Ltd. (*hereafter referred to as BEIS*) is a supplier of products and services for building, civil engineering and industrial applications. The product range includes mast climbing work platforms, various types of scaffolding and aluminium towers, formwork and related products, powered access equipment, building and site products, as well as related services.

In respect to the activities it can control or expect to have reasonable influence on, BEIS recognises its responsibility for protecting the environment and this policy is a statement of that commitment. Therefore, BEIS will: -

1. Continue to reduce the environmental impact of our activities, products and services by implementing a system of continual improvement of the company's operations and environmental performance.
2. Continue to invest in cost effective energy efficiency and conservation.
3. Use non-renewable and natural resources efficiently, with careful planning, and apply the principles of sustainability where practicable.
4. Control and reduce waste and recycle or re-use material wherever possible, reduce the impact on landfill disposal, and reduce the usage of 'consumables'.
5. Will apply controls to the storage/use of products and materials to avoid land and ground water contamination occurring.
6. Will reduce emissions to air, hence reducing contributions to global warming, acid rain and local air quality.
7. Improve the visual impact of the operational sites and, where possible, reduce noise generated from the sites.
8. Ensure our activities are safe for our employees, customers, the public, sub-contractors, neighbours and others associated with our business.

We are committed to complying with the applicable environmental legal and regulatory requirements, and other requirements to which the organisation subscribes, which relate to the company's environmental aspects. We are also committed to the prevention of pollution. In order to ensure effective management of this policy, the Company will: -

- Create a management programme with objectives, and set performance targets;
- Develop control procedures, and employ monitoring and measurement methods to ensure this is done;
- Audit and review environmental performance annually and the effectiveness of the environmental management system through the Health, Safety, Environmental and Quality meeting forum;
- Integrate environmental considerations into future policy decisions;
- Recognise and encourage the contribution every employee can make towards improving the Company's environmental performance.

This policy and its associated procedures are to be followed by all employees and any others working for or on behalf of BEIS. This policy will be communicated to customers, suppliers, and be available to the public. In order to achieve the above, an Environmental Management System is established and will be maintained, incorporating the requirements of ISO14001:2015. The BEIS Environmental Management System shall be reviewed annually or more frequently if there is any substantial change BEIS personnel and procedures.
